

Coastal Creatures is an exciting two year project which focuses on the diverse marine and coastal natural heritage of the North Devon Coast Areas of Outstanding Natural Beauty (AONB).

We are looking for schools and teachers to make the most of our project which includes Learning in the Natural Environment (LINE). We can offer:

- In class workshops on protection of the marine and coastal environment and rocky shore survey techniques
- Outdoor coastal workshops on the beach or shore including strandline searches, beach cleans and surveying of rocky shore animals and plants
- Transportation to get you and your pupils to the coast and back to school
- Training for school staff on delivery and content of coastal outdoor science classes at your nearest beach or shore

OTHER ELEMENTS OF THE PROJECT

We are looking for volunteers interested in participating in:

- Beach cleans
- Wildlife and beach surveys
- BioBlitzes (mass wildlife surveys)
- Wildlife groups
- Work experience/ placements
- Coastal educational activities

Coastal Creatures is targeting four beaches in the AONB

North Devon Areas of Outstanding Natural Beauty

Coastal Creatures target beaches
